Jessie James FullStack Web Developer

WEB DEVELOPMENT WORK:

R T C Mood Tracker –[Mood Tracking Website](#) – *[Github: Moodtracker](#)*
- Mood Tracker website to allow for tailored questions without inferring a specific mental illness. Built to be a software as a service
- Worked with the UX team to 1. Find the problem 2. Do user testing/card sorting 3. Work on user flow and design intentional user feedback.

Built with: JavaScript, React, Axios, MongoDB, Mongoose, CSS, Express

Strong Xchange– [StrongXchange.surge.sh](#) – *[Github: Xchange](#)*

- Currency conversion website that allows the user to see: 1) Rate of conversion 2. Converted currency amount 3. Strength of one currency compared to another. Strong X change used the Fixer.io database.

Built with: JavaScript, React, Axios, HTML, CSS

Daddy Daughter Date Box–[Daddy Daughter Date Box Website](#) – *[Github:DDDB](#)*
- Group project where we built a subscription box styled website where Dads can order monthly date boxes for their young daughters.
- My role: Built the server, database and routes for the backend. Built the global provider and used axios to access the database.

Built with: JavaScript, React, Axios, MongoDB, Mongoose, CSS, Express
